

Design a modern, professional homepage for GEP Network, a full-service live event production company (concerts, tours, festivals, corporate events) with 40+ years of experience and clients including Live Nation, AEG, Kendrick Lamar, J. Cole, Nicki Minaj, and BET. This is NOT a band or artist website — it's a B2B production/logistics company, so avoid any music-fan, ticketing, or "listen now" visual language.

STYLE: Dark, bold, editorial, and sleek — think high-end entertainment-industry agency, similar to Clair Global or Solotech. Near-black/charcoal base with one confident accent color. Bold uppercase display typography for headlines, clean sans-serif for body text. Full-bleed real photography with darker overlays for text legibility. Generous white space, clean card components, subtle hover effects and scroll animations. No stock-photo look — treat all images as placeholders for real production photography.

BUILD THESE SECTIONS IN ORDER:

1. HEADER — Logo left, single navigation menu right (Home, About Us, Services, Events, Contact Us), phone number, and a "Request a Quote" CTA button. Only one menu trigger — no duplicate menu buttons.

2. HERO — Full-width image or video background, dark overlay. One short headline (who GEP is), one short subhead (what they do), one primary CTA button. No long paragraphs.

3. STATS BAR — Four-item horizontal stat row: "40+ Years Experience," "500+ Productions," "Nationwide Staffing," "Tours • Festivals • Corporate Events."

4. FEATURED PRODUCTIONS CAROUSEL — Horizontal scrolling carousel of past productions/artists: Roots Picnic, Rolling Loud, J. Cole, Playboi Carti, Don Toliver, Mary J. Blige, Jill Scott, Kendrick Lamar, Nicki Minaj.

5. WHY GEP — Short, confident 2-3 sentence statement on why GEP is the right choice. Pair visually with the stats above.

6. SERVICES GRID — Clean static or hover-reveal cards (NOT flipping cards) for 8 services: Production Management, Production Coordinator, Event Management, Artist Services, Stage Management, Travel Logistics, Tour Storage, Design Services.

7. STORAGE SECTION — Three image cards: Multi-Dock Access, Music Industry Expertise,

Courteous Service.

8. CLIENT LOGO WALL — Grid of client/partner logos (Live Nation, AEG, BET, etc.) as social proof, positioned after the "Why GEP" statement.

9. PRODUCTION STAFFING — Clean two-column list (not styled like a dropdown accordion)
of staffing roles: Production Managers, Production Coordinators, FOH & Monitor Engineers, Tour & Venue Security, Video Techs, Stage Managers, Carpenters & Stage Hands,
Sound & Audio Techs, Backline Techs, Catering Specialists, Bus & Truck Drivers.

10. TESTIMONIALS — 3-5 client quote cards or slider.

11. CAREERS TEASER — Short "Careers — Join the Crew" strip with one CTA.

12. FOOTER — Contact/booking info with visible email, working social icons only (no dead/unlinked accounts), address, phone.

Keep copy tight throughout — this audience wants to know who GEP is, what they do, why they're the best choice, and how to make contact, within seconds of landing.
